COMPREHENSIVE SOLUTION

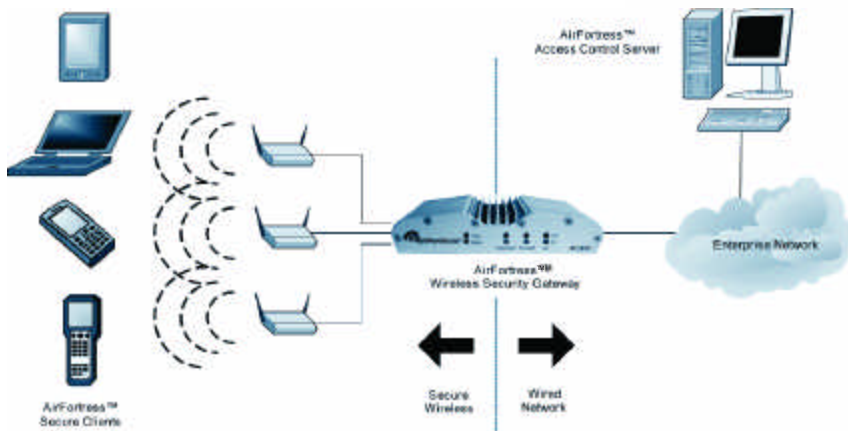

Fortress Technologies is the trusted source for securing and managing wireless networks. With extensive experience providing security solutions for use in the most demanding environments, Fortress delivers a flexible and market-proven solution for securing 802.11 wireless LANs. In an environment of ever-increasing security concerns and regulations, Fortress provides enterprise-grade wireless infrastructure products to enforce the right policies to protect your wireless LAN.

PROVEN SECURITY

With the unequalled protection of Three Factor Authentication™ network, device and user - the AirFortress product family offers a reliable, government-validated (FIPS 140) security solution for wireless LANs.

THE *airFortress* PRODUCT FAMILY

BRIDGE-BASED DESIGN SUPPORTS

- 802.11 WLAN (a,b,g...)
- 802.11 point to point
- 802.16
- Legacy 900 MHZ
- OpenAir 2.4

1. AF Secure Client 2. AF Wireless Security Gateway 3. AF Access Control Server

FEATURES

- Protocol and AP independent: supports all wireless vendors
- Integration with RADIUS, LDAP and NT Domains
- Data Link layer protection encrypts entire Ethernet frame
- Choice of encryption: DES, 3DES, AES (128,192, 256)
- Supports IP phones, wireless scales, industrial instruments
- Optimized handling of wireless traffic improves throughput
- Hot spare fail-over option to ensure maximum availability for mission-critical applications

BENEFITS

- Complete wireless LAN security solution providing privacy, authentication and access control
- Easy to deploy; simple to manage
- Protects the data, network and device
- Requires no change to network or directory services
- Protects investment in legacy devices, operating systems and network equipment
- Works with all 802.11 wireless LAN products (a,b,g)

airFortress FAMILY OF WIRELESS SECURITY GATEWAYS - Full-featured security appliances provide a secure edge to the corporate network. The AirFortress Wireless Security Gateways enforce protected communications between wireless devices and the rest of the network. Gateways are available in models suited for large-scale wireless LAN deployments or smaller distributed networks with isolated pockets of wireless LAN users.

AF2100

AF7500

GATEWAY SPECIFICATIONS

Form Factor	Compact design	1U standard rack mount chassis
Size / W x D x H / in. (cm)	8.5 x 6 x 1.75 (21.6 x 15.2 x 4.5)	17 x 12 x 1.75 (43.2 x 30.5 x 4.5)
Weight	2.6 lbs / 1.2 kg	7.5 lbs / 3.4 kg
Connections	3-RJ45 10/100Mbps Ethernet, 1-serial	3-RJ45 10/100Mbps Ethernet, 1-serial
Power Supply	External AC-DC power adapter	40W power supply
Cooling	Fanless heat-sink chassis	2 exhaust fans
Operating Temperature	0 to 60 degrees Celsius	0 to 35 degrees Celsius
Safety & Emissions	CE, FCC and UL	CE, FCC and UL

airFortress SECURE CLIENT

Secures communication between a device and the network, as well as peer-to-peer

- Lightweight software client module for laptops, PDA's, tablet PCs, thin client devices and industrial equipment such as barcode scanners and portable terminals
- Protects device from ad-hoc, peer-to-peer intrusion

airFortress ACCESS CONTROL SERVER (ACS)

Security-centric management and policy control platform

- Highly scalable control platform offering centralized management for wireless LANs
- Acts as a policy manager integrating with RADIUS, LDAP and NT Domains
- Device authentication capability allows specific devices to be granted or denied access
